DETAILED ACTION

Priority

The petition under 37 CFR § 1.78(a)(3) and 1.78(a)(6) has been granted.

Information Disclosure Statement

The information disclosure statement filed September 11th, 2006, has been considered by the examiner. It is noted that the correct publication number for reference AO is 2002/0171827.

Examiner's Comments

The Hitachi Ltd. Reference (JP 64-091037) cited in the IDS, filed September 11th, 2006, discloses a cell for photometric analysis comprising a cell body comprising plates of various dimensions being formed from clear quartz and black quartz, a light input means positioned axially to said cell body where the light input means and the cell body are within a first plane, a light source means for emitting an excitation beam of a predetermined wavelength, wherein the excitation beam produces fluorescence, a means for retro-reflecting the excitation beam back, a light output means positioned substantially parallel to an axis of the flow channel and to the first plane of the cell body, a means for reflecting the fluorescence toward the light output means, and a light detector means positioned contiguous to the light output means. It does not disclose a flow cell, that the excitation beam flows axially **through** the flow channel (interpreted by examiner from the drawings and the specification to mean the axis of the flow of the flow cell), and it does not disclose a light output means positioned substantially parallel to a long axis of the flow channel.

Examiner's Reasons for Allowance

Claims 1-10, 16, 20, and 24-26 are allowed over the prior art of record for the reasons set forth in the previous Office Action (paper number 0905).

Art Unit: 2877

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
